ST XAVIER'S COLLEGE, Ahmedabad, is a Jesuit College founded in 1955. It provides quality education and is best known for the code of discipline and the values it instils in students to assist in their overall development. It was conferred autonomous status in 2014 by the UGC. It was accredited with A+ (4th cycle of reaccreditation) grade in 2022 by NAAC and has been declared a "College with Potential for Excellence" since 2006. National Institutional Ranking Framework (NIRF) ranks Xavier's in the band of top 100-150 colleges in India. Gujarat State Institutional Rating Framework (GSIRF) has consistently ranked Xavier's with 'Five/four Stars'. Rankings of 2024 are, India Today: Arts – 27, BCA – 16, Commerce – 177 and Science – 34; The Week: Arts – 28, Science - 33 and Commerce – 79 and The Outlook-ICARE: Arts – 26, Science – 22 and BCA – 10. India Today also ranks us under the TOP 10 Colleges with Best Value for money.

With the implementation of academic autonomy, the college has integrated a variety of value based syllabi to its curriculum including capacity building, human resource development modules, a Personal Growth Oriented Programme and many skill development programmes. Such Education^{Plus} programmes not only help students to furnish their potentials, but also to contribute to nation building.

With the aim of empowering students in the changing context with wide variety of options in the job market, the College is happy to introduce new postgraduate and undergraduate programmes with the expertise from both academia and industry. These courses aim at equipping students with relevant and meaningful skills and competencies which are keenly sought after by industries and society in our highly competitive, goal-driven and globalised world.

We implemented the National Education Policy 2020 (NEP 2020) from the Academic year 2023-2024. Under NEP 2020 the students have multiple exit options. The students can exit after the first year with a Certificate, after the second year with a Diploma, after the third year with a Degree and after the fourth year with Hons. Degree. NEP 2020 aims to provide students with flexibility and choice in their education and encourages a multidisciplinary approach. It also gives ample opportunities for research during the curriculum and opens up new vistas for research and development.

We offer several government-aided and self-financed programmes in Arts, Science, Business Administration, Commerce and Computer Science.

Duration: Undergraduate - Degree 3 years, Hons. 4 years & Masters – 2 years
Timing@: Arts, Commerce & Computer Science – 7.40 am & Science – 11.10 am onwards

@ Refer to the individual programme for change in timing. Management has the right to change the timing of class and lab hours and suspend any Self-Financed programmes.

Government Aided Programmes – Undergraduate Programmes

Bachelor of Arts and Humanities

BA - Economics (English and Gujarati Medium):
The programme aims to introduce the basic concepts in economics moving on to an in-depth understanding of Micro and Macroeconomics, Trade and Public Finance, Indian Economy, Gujarat Economy, Managerial Economics, environmental economics, growth and development, Mathematical Economics, Econometrics, etc. The curriculum enables students to think critically on government policies, and propose appropriate policy interventions that are required to make the economy more vibrant.
For more info: https://sxca.edu.in/academics/departments/arts-humanities/economics/

BA - English:
The programme is designed to train students in critical thinking and interpretation through exploration of English literature and critical theory. Texts in focus range from traditionally canonical ones to current experimental genres like graphic novels and translations of marginal texts. The course also offers a Vocational specialisation with papers in English Language and Communication Skills as well as Media studies for students interested in learning English Language at a more advanced level, in order to pursue careers in media and mass communication, TESOL, Second language studies as well as linguistics.
For more info: https://sxca.edu.in/academics/departments/arts-humanities/english/

BA - Gujarati:
The programme in Gujarati includes works of eminent writers of different eras, giving a glimpse of the societal conditions, the ethos and culture during medieval times and understanding the changes that have enabled the cultures and language to evolve. The programme aims at enabling students to be conversant with the subject as they could grow to become content writers, journalists, authors, poets and facilitators.
For more info: https://sxca.edu.in/academics/departments/arts-humanities/gujarati-hindi/

BA - Psychology (English and Gujarati Medium):
The programme helps to explore and gain an in-depth understanding of human behaviour and mental processes. The subject studies the mind, brain and social interactions. It assists people to improve their skills in decision making, managing stress and leading a positive life. The curriculum includes courses in behaviour studies, counselling, personality and industrial psychology.
For more info: https://sxca.edu.in/academics/departments/arts-humanities/psychology/
BA - Sanskrit:
The programme comprises a detailed study on Sanskrit Drama, its types, special features of Sanskrit one Act Plays, Criticism on the episodes of literary works like Bhasa, Bhagavad Gita, Kalidasa's Raghuvansham and Upanishads. Understanding the styling of various writers, Psychological aspects of a play in accordance with the Concept of 'Stress' are also unravelled in the course.
For more info: https://sxca.edu.in/academics/departments/arts-humanities/sanskrit/

Bachelor of Science

BSc - Biochemistry:
Biochemistry involves the chemistry of life and it touches the various aspects surrounding life as we know it today. Being a relevant field in pure sciences, our department offers a course that is not only interesting but covers a wide range of topics. Basics of cell and molecular biology, microbiology, bio-physics, cell culture techniques etc. are illustrated over the course of four years by the dignified faculties. A relevance of the theoretical basics to practical work is what makes the course/department unique.
For more info: https://sxca.edu.in/academics/departments/science/biochemistry-biotechnology/
BSc - Biochemistry with Voc. Biotechnology:
This programme was conceptualized with the thought of orienting students towards entrepreneurship. The course work includes a component on entrepreneurship that gives an insight into essentials of beginning a small-scale industry. The students opting for this programme will have Biochemistry as the core subject supplemented with additional papers of Vocational Biotechnology each semester. A summer internship is an important feature of this programme.
For more info: https://sxca.edu.in/academics/departments/science/biochemistry-biotechnology/
BSc - Botany:
The undergraduate programme in Botany investigates the science of life at all levels, from microorganisms to population ecology. The curriculum engages students to study nature by travelling through taxonomy, plant diversity, plant anatomy, plant physiology, plant genetics, plant biochemistry, ecosystems, environment, bioinformatics, ecology, cytology and through economic botany, ethnobotany, gardening and landscaping among the applied sectors.
For more info: https://sxca.edu.in/academics/departments/science/botany/
BSc - Chemistry:
Chemistry is offered as a part of several subject combinations. The thrust is in developing a strong foundation in the basic concepts. The curriculum covers every area of Chemistry, comprising inorganic chemistry, organic chemistry, physical and analytical chemistry. These basics are supplemented with specialized topics like green chemistry, photochemistry, everyday chemistry and applied chemistry. The students' potentials are honed by allowing them to venturing into outside the classroom activities like taking part in poster presentations, seminars, workshops etc.
For more info: https://sxca.edu.in/academics/departments/science/chemistry/
BSc - Chemistry with Voc. Industrial Chemistry:
This programme was conceptualized with the thought of orienting students towards entrepreneurship. The course work includes a component on entrepreneurship that gives an insight into essentials of beginning a small-scale industry. The students opting for this programme will have Chemistry as the core subject supplemented with additional papers of Vocational Industrial Chemistry each semester. A summer internship and the in-house industrial training unit (Dexic) are important features of this programme.
For more info: https://sxca.edu.in/academics/departments/science/chemistry/
BSc - Electronics:
We are surrounded by electronic appliances and gadgets. The course in Electronics lays a very important foundation which can enable a student to make a career in electronic industry and Research. The Future belongs to AI and quantum computing. The course in Electronics can be that first step forward.
For more info: https://sxca.edu.in/academics/departments/science/physics-and-electronics/
BSc - Mathematics:
The programme in Mathematics prepares to think logically, plan strategically and then apply the appropriate methods to solve the problem based on the acquired knowledge. It has a myriad of opportunities in actuarial sciences, mathematical modelling and mathematics education as well as for graduate school leading to a research career in mathematics or statistics.
For more info: https://sxca.edu.in/academics/departments/science/mathematics/

BSc - Physics:
Passionate about the wonders of the universe and understanding mysteries of nature? Delve into the captivating realm of physics with our BSc program. From the enigmatic beginnings of the universe to the intricacies of quantum mechanics, physics offers a gateway to exploration and discovery. Our comprehensive curriculum covers a spectrum of topics, from foundational principles like electricity and magnetism to cutting-edge theories such as dark matter and string theory. With state-of-the-art facilities and a vibrant academic community, the department of Physics and Electronics provides the perfect platform for launching your journey into the fascinating world of physics.
For more info: https://sxca.edu.in/academics/departments/science/physics-and-electronics/

BSc - Statistics:
Statistics is a science of learning from data. The undergraduate programme in Statistics introduces the basic concepts of probability, random variable, expectation, raw and central moments and least square method. The course will enable distinguishing between random and non-random experiments, to find the probabilities of events, to fit various mathematical curves (linear and non- linear) to observed data, to discuss the idea of statistical quality control, and to discuss hypothesis testing.
For more info: https://sxca.edu.in/academics/departments/science/statistics/

BSc - Zoology:
An undergraduate programme in Zoology is designed with a research orientation, and deals with animal behaviour, anatomy and their ecology. It is a conglomerate of understanding the animal world from both outside as well as at the molecular level. The syllabus comprises physiology, biochemistry, animal diversity (nonchordates and chordates), ecology, cancer biology, cytology, genetics, animal biotechnology, organic evolution, biophysics, some physio-chemical laws applied to physiology, applied entomology.
For more info: https://sxca.edu.in/academics/departments/science/zoology/

Postgraduate Programmes

MSc - Chemistry (Organic):
The Masters Programme offers an exciting range of educational opportunities, with strengths in both the fundamental area of the discipline, and in significant new areas and applications. Graduate-level coursework, research opportunities, industrial training and field visits are available in physical, organic, inorganic, and analytical chemistry as well as in a substantial number of cross-disciplinary and interdisciplinary areas such as material sciences, surface science, spectroscopy, magnetochemistry, and biological chemistry. Moreover, the department has an excellent array of equipment for research/ project works.
For more info: https://sxca.edu.in/academics/departments/science/chemistry/

Self-Financed Programmes – Undergraduate Programmes

BA - Economics: (time 1.00 pm onwards)
The BA Hons. programme in Economics is offered with the objective of fulfilling the need for a four-year programme which offers applied papers and project work along with collaboration with other departments like statistics, mathematics, computer science. The course aims at providing a competitive edge, increasing employability prospects of the students and developing stronger analytical skills. The course focusses on Quantitative methods, Research aptitude and Vocational skills such as SPSS, Excel, Python, Content Writing, Report Writing etc.
For more info: https://sxca.edu.in/academics/departments/arts-humanities/economics/

BA - English: (time 1.00 pm onwards)
The self-financed BA (English) Hons. programme complements its well-known and historical government aided BA (English) degree course. Similar to the morning government course, this course in the afternoon attempts to maintain the standards and rigour of a traditional BA (English) but at the same time, offers different subject combinations of Theatre, Sociology, Psychology and Economics. It also prepares students for related industry requirements and attempts to introduce students to as many interrelated fields as possible, thus encouraging them to immerse themselves in knowledge beyond borders, without boundaries.
For more info: https://sxca.edu.in/academics/departments/arts-humanities/english/

BA - Psychology: (time 1.00 pm onwards)
The programme helps to explore and to gain an in-depth understanding of human behaviour and mental processes. The subject studies the mind, brain and social interactions. It assists people to improve their skills in decision making, managing stress and leading a positive life. The curriculum includes courses in behaviour studies, counselling, personality and industrial psychology.
For more info: https://sxca.edu.in/academics/departments/arts-humanities/psychology/

BA - Sociology and Development: (time 1.00 pm onwards)
The programme helps to explore and gain an in-depth understanding of the dynamic intersection of society and development. Through rigorous coursework and community engagement, students will examine

fundamental human institutions such as family, religion, politics, and economics, gaining insights into their roles and functions in contemporary society. Whether you aspire to pursue a career in social development, policy analysis, government or private sector professions, entrepreneurship, or self-directed learning, this program empowers you to chart a meaningful learning journey towards the future of work.

For more info: https://sxca.edu.in/academics/departments/arts-humanities/sociology/

BPA - Theatre and Production Management: (time 1.00 pm onwards)

Department of Communication offers a four-year Hons. degree in Theatre and Production Management. The course offers comprehensive study of various aspects of theatre such as acting, direction, script writing as well as aspects of production management that include lights design and management, sound design, branding, and marketing of theatre plays. The course aims to develop theatre artists who aspire to craft their knowledge in professional theatre, films, radio, or television.

For more info: https://sxca.edu.in/academics/departments/arts-humanities/communication/

BCom - Business Process Services (BPS):

This is a very unique 4-year full time degree programme designed by experts of Tata Consultancy Services (TCS) and academia. The core focus of the course is to prepare students for successful professional career in the BPS industry. The students can also achieve efficient employability in sectors like Banking, Insurance, Retail markets, Capital markets and so on. The curriculum develops a strong knowledge base and enables students to think critically and coherently on scientific concepts, formulate ideas, design experiments and communicate effectively and creatively that are required for employability.

For more info: https://sxca.edu.in/academics/departments/commerce/

BCom (General):

The programme aims to introduce the basic concepts in Commerce enabling them for further studies in Commerce. The curriculum includes in-depth understanding of commercial law, market research taxation, banking, operation research, corporate ethics, entrepreneur development, etc., enabling students to think critically and coherently on scientific concepts, formulate ideas, design experiments and communicate effectively and creatively that are required for employability.

For more info: https://sxca.edu.in/academics/departments/commerce/

BCA - Bachelor of Computer Applications:

BCA is one of the most opted courses to be offered for a career in Information Technology. Key areas of computer studies and industrial computing along with the required analysis and synthesis involved in the information systems is ingrained in the curriculum. After the successful completion of the program, a student should be able to get an entry level job in the field of Information Technology or ITES. BCA graduates can also start their career as programmers and rise to that of senior programmers. Software Development & Design in companies like Microsoft, Oracle, Wipro, Infosys etc. and System Administrator in big corporate companies like Citibank, HLL, P & G etc are some of the opportunities open for students.

For more info: https://sxca.edu.in/academics/departments/computer-sciences/

BS - Business Administration: (time 1.00 pm onwards)

The BS Business Administration is a four-year Hons. program with specialization in Finance and Marketing, designed to develop high-level professional competencies through research and practical learning. It equips students with the skills to analyze business environments and make strategic decisions in both professional and personal spheres. The curriculum prepares students for managerial roles such as Business Analyst, Marketing Consultant, and Financial Executive. With a focus on Banking and Financial Services, Investment and Financial Statement Analysis, and Risk Management, the program nurtures financial expertise to support India's rapidly evolving economy. Additionally, it enhances communication, critical thinking, problem-solving, and teamwork, paving the way for strong career prospects in diverse commercial sectors.

For more info: https://sxca.edu.in/academics/departments/commerce/

BSc - Artificial Intelligence and Machine Learning: (time 8.40 am onwards)

The BSc in Artificial Intelligence (AI) & Machine Learning (ML) program provides a solid foundation in AI & ML, blending theory with practical experience. Aligned with the National Education Policy (NEP), it meets the rising demand for AI professionals across various sectors like healthcare, finance, and robotics. Key subjects include Python Programming, Data Science, and AI Fundamentals, fostering coding and analytical skills. Through practical projects, internships, and industry collaborations, students gain real-world experience. Guided by expert faculty, the program encourages critical thinking, innovation, and entrepreneurship, preparing graduates for careers in AI, data analysis, and research.

For more info: https://sxca.edu.in/academics/departments/computer-sciences/ds-ml/

BSc - Biotechnology:

The programme in Biotechnology introduces broad horizons of the science of biotechnology. The practical and analytical approach to the basic principles of subjects like biochemistry, microbiology, molecular biology, cell biology, immunology are its main focus areas. The course work includes a minor research project in the last semester with the objective of enhancing the ability of students to design experiments, analyse data and understand the relevance of research for development.

For more info: https://sxca.edu.in/academics/departments/science/biochemistry-biotechnology/

BSc - Information Technology: (time 1.00 pm onwards)

The Bachelor of Science in Information Technology (BSc IT) is a four-year undergraduate program launching in June 2025, designed for students from Commerce and Science backgrounds. Aligned with the National Education Policy (NEP), it offers a strong foundation in programming, networking, cybersecurity, and data management. With an industry-driven curriculum, students gain practical experience through projects, internships, and hands-on training, preparing them for careers in IT firms, startups, and multinational companies. Eligible candidates from Commerce or Science streams can apply and take the first step toward a dynamic career in technology.

For more info: https://sxca.edu.in/academics/departments/computer-sciences/

Postgraduate Programmes

MA - Clinical Psychology:

Psychology, an integral part of human life, helps us understand the complexity of human behaviour and unravel mental operations as well as human performance. The objective of a Master's Degree Programme in Clinical Psychology is to help students gain an in-depth understanding of mental health, human behaviour and to prepare students to offer services as a Clinical Psychologist in the professional realm.

Apart from an up-to-date coursework, students will also get a chance to carry out internships. This course helps to break the stigma around mental illness and in turn, practice knowledge at a professional level.

For more info: https://sxca.edu.in/academics/departments/arts-humanities/psychology/

MA - English:

Studying English at St. Xavier's College, at the Postgraduate (MA) level, combines a focus on linguistic proficiency with an attempt to nurture critical thinking and engagement with creative literary works. While language skills are a recognized necessity given the competitiveness of the national and international job market, the development of the ability to read critically and empathetically, to critique cultural artefacts and to establish rigorous and current theoretical frameworks for social and textual analysis form an integral part of humane living. The humanities in general, and literature in particular, have the ability, through this focus, to further what has been a long term aim as far as the College is concerned: equitable and just processes of learning, taking into account a multiplicity of positions from which this knowledge is produced.

For more info: https://sxca.edu.in/academics/departments/arts-humanities/english/

MSc - Artificial Intelligence:

The program presents a specialized curriculum in Artificial Intelligence (AI) and Machine Learning (ML), aligning with the National Education Policy (NEP) to ensure a broad and inclusive education. It introduces the expansive role of AI & ML in various industries, emphasizing practical employability, innovation, and entrepreneurship. Core courses include Python Programming, Data Science, and Analytics, equipping students with essential technical skills. The course fosters collaboration with leading industry giants like IBM and ISRO, providing a window into cutting-edge technology and research. With a commitment to dynamic learning, the program employs interactive teaching methods and is delivered by a mix of international and local experts. The course is coordinated and instructed by seasoned professionals, ensuring a rich educational experience that encourages students to engage in project-based learning and real-world problem-solving.

For more info: https://sxca.edu.in/academics/departments/computer-sciences/ds-ml/

MSc - Big Data Analytics (BDA):

'Data is the future.' Data is the most important element in any venture. Data gives us glimpses of the past, reality of the present and strengthens us to predict the future. The Tata Consultancy Services (TCS) initiative has made remarkable strides in shaping the talent capability aligned to data analysis, business requirements and to accrue seamless mutual benefits for the world of academics and industry. The objective of this course is to contribute to overall development of the student community in order to enhance quality and consistency of talent supply by channelizing practical industry knowledge to the classroom. The course work comprises Advanced Statistical Methods and Machine Learning, Foundations, Computing and Enabling Technologies for Data Science, Linear Algebra & Linear Programming and Database Management etc.

For more info: https://sxca.edu.in/academics/departments/computer-sciences/ds-ml/

MSc - Biochemistry:

The programme in Biochemistry goes into depths of working of the multifaceted proteins, DNA and RNA with the objective of highlighting why understanding basic mechanisms and techniques together ensure significant basic research. The programme is formulated for developing competent Biochemists leading towards a PhD programme. The programme obliges students to read original publications and envisages significant inputs in laboratory work, communication skill, creativity, planning, execution and critical evaluation of the studies undertaken. The students can opt for in house projects or choose to apply to research institutions and industries for the dissertation projects.

For more info: https://sxca.edu.in/academics/departments/science/biochemistry-biotechnology/

MSc - Biotechnology:

Biotechnology is a product-oriented science that has its applicability in sectors as varied as Agriculture, Food and nutrition, public health, Therapy and diagnostics, Environment, Textile industry and thus it entails the need to have a strong knowledge base of Metabolism, Molecular biology, Microbiology, Genetic engineering, Bioinformatics, immunology, analytical and technical skills. The curriculum of this MSc. programme has been designed to ensure that the student strengthen their knowledge base and go through experiential learning modules to hone their technical skills. The curriculum has got acquiescence from professionals in academics and industry.

For more info: https://sxca.edu.in/academics/departments/science/biochemistry-biotechnology/

MSc - Botany:

With expertise in the fields of Taxonomy, Ethnobotany, Gardening, Medicinal Botany, Remote Sensing and Mycology, the Department seeks to offer an MSc program which equips students with skills in each of these areas. Students will benefit from the linkages that the Department has with other Science departments of the College and with neighbouring Colleges as well as from the extension linkages that the Faculty have with tribal and other communities related to ethnobotanical, agricultural, landscaping and taxonomic projects. The department has over 3000 books and journals along with a Herbarium and a collection of seeds and wood samples. Students of the Department have excelled in art, sports as well as in co-curricular and extension activities.

For more info: https://sxca.edu.in/academics/departments/science/botany/

MSc - Chemistry (Analytical):

Chemical analysis is a common feature linking earth sciences, pharmaceutical sciences, environmental sciences, petrochemical industry, forensic sciences etc. An analytical chemist can help identify and solve problems in these varied areas of research. Against this backdrop and with the sole aim of moulding students with the requisite skill-set needed to be employable analysts; we offer MSc. Chemistry (Analytical). The course has been designed with special emphasis on developing research aptitude, providing a strong background in instrumental techniques and enhancing employability.

The course includes topics such as Qualitative Optical Spectroscopy, Electroanalytical Chemistry, Modern Separation Chemistry, Clinical and Regulatory aspects of Drug Discovery, Bioanalysis, Environmental Analysis and an industrial training program.

For more info: https://sxca.edu.in/academics/departments/science/chemistry/

MSc - Mathematics:

The Master's Program in Mathematics gives an opportunity to the students to broaden their knowledge in the subject with a focus on applications. The programme is designed to ensure that students are able to do well in competitive exams. The understanding of the different modules will prepare the students to take up teaching profession and for careers in the government sector, corporates, and research institutes. The programme will also enthuse students to pursue their doctoral studies.

For more info: https://sxca.edu.in/academics/departments/science/mathematics/

MSc - Microbiology:

MSc Microbiology course is designed to understand the power of microorganisms by gaining in-depth theoretical and practical knowledge. The curriculum and new approach of learning will empower students to understand microbial diversity and their potential to deliver the solutions for Industries, Agriculture and Environment. Student will plan and start their research project in Sem-III, which will continue and be completed in Sem-IV. We encourage students for independent scientific thinking to increase multi-dimension research potential to tackle local and global challenges with ethics and value-driven learning.

For more info: https://sxca.edu.in/academics/departments/science/microbiology/

MSc - Physics:

The Master's Programme in Physics is initiated with the mission to champion fundamental and applied science, help students explore and connect physics with the world around them, and enable them to stay connected with science through research, academia or industry. The department has partnerships with renowned centres of research excellence for students to work with scientists of repute and gain hands-on experience of the most advanced experimental techniques and the most sophisticated theoretical and experimental methods. The curriculum encompasses Quantum Mechanics, Atmospheric physics, Condensed Matter, Nano Science and Technology, Material Sciences, Nuclear Physics, Electronics and Theoretical Physics and much more. The research work in the final semester will provide an opportunity to select students to work at Institute of Plasma Research (IPR), Physical Research Laboratory (PRL), Space Application Centre (SAC) etc. This course enables students to explore exciting careers in national and international research laboratories related to the diverse branches of Physics, academic institutions, space organization, meteorology departments, medical industry. electronics industry, public services, Armed forces and much more.
